- Introduction react
  - What is it?
  - Alternatives
  - Functional javascript
  - Requirements
  - Recommended tools
- ES6
  - Transpiling
  - Variables
  - Arrow functions
  - Objects and arrays
  - Promises
  - Classes
  - Modules
- Functional programing
  - Meaning of functional
  - Imperative vs declarative
  - Immutability
  - Pure functions
  - Data transformation
  - HO functions
  - Recursion
  - Composition
- Pure react
  - Virtual DOM
  - React elements
  - React DOM and children
  - Elements with data
  - React components
  - DOM rendering
- React with JSX
  - Syntaxis and differences with Html
  - Curly braces
  - Babel webpack
- Props state and component tree
  - Props validation
    - Proptypes
    - default value
    - custom validation
    - stateless component validations
  - Refs
  - State management

- React components
  - Component lifecycle
  - HO components
- Testing react components
  - EsLint
  - Jest
  - Enzyme
- React router
  - Router properties
  - Nesting routes
- Redux
  - Actions
  - Store
  - Reducers
  - Dispatcher
- React Redux
  - Compose
  - Map state to props
  - Map dispatch to props
